

## Join Our Community of Learners this Summer

Our program actively engages students, builds confidence, enhances study skills and fosters creative thinking and problem-solving. Each child's program is customized to fit his or her individual learning style. Our students learn strategies and techniques to succeed academically, which results in achieving optimal performance in areas of challenge. We work with students ages 6—16 who need continual academic assistance, those who need an extra boost to earn a higher grade and students who enjoy academic enrichment. Our professional staff of teachers will also work on focus and attention, stamina, positive study habits, independent task initiation and completion.

**Cost Effective**
